

SCOTT CHRISTOPHER ROMACK

UX Design & UI Development Strategys

EXPERIENCES

Avaya =>

User Experience Design & Frontend Architect

2013 - 2016

Designed built and tested / HTML5,CSS3 Angular based mobile first web applications that just work in all modern devices mobile, desktop, and beyond. see. <http://www.avaya.com> but most of the good work is to come.

Dotvita

User Experience Design & Frontend Architect

MAY 2012 - DEC 2012

Implemented creative design and front-end code for resolution independent HTML5 CSS3 & jQuery interfaces that work in any mobile or desktop device out of the box without having to set up a different mobile domain and site. Clean responsive web and mobile design fast and accurate.

Amplificommerce

User Experience Design & Frontend Architect

2011 - 2012

Design front-end code and integrate HTML5 CSS3 and custom jQuery interfaces for high-end e-commerce websites leveraging Oracle's ATG platform.

Archipelago Learning

User Experience Design & Frontend Developer

2010 - 2011

Redesigning core product suite and developing front end code using HTML5 mobile web technologies jQuery and custom CSS framework. Headed up Information Architecture, wire-framing and usability testing & design.

bazaarvoice

User Experience Design & Frontend Developer

2009 - 2010

Bazaarvoice does white-label online ratings for the likes of Dell, Macy's, Best Buy. The implementation designer creates css to seamlessly fit the online ratings and other social media into the client's existing page so the ratings are there inline where they are needed so the consumer can make an informed decision based on a real persons experience with the product. Hand code css in Java development environment and perform rigorous browser testing.

EXPERIENCES 2

Exhibit Group

User Experience Design & Frontend Architect

2009 - 2009

Designed and coded support materials for tradeshow exhibits in print, web, flash, and html email (blah). Used salesforce to track email campaigns.

Enilon

User Experience Design & Frontend Architect

2009 -2009

Front-end coded HTML5 CSS3 for various projects for enilon.com. Designed flexible customizable content management system templates and Hand code (textmate & CSSedit) HTML/CSS/Javascript.

Object Systems Group

User Experience Design & Frontend Architect

2008 - 2009

Designed and built standards compliant HTML, CSS & Javascript for enterprise mashups for several clients including The World Bank, Brinker, and MGM among others. Leveraging my freshly acquired Edward Tufte training in data density design a.k.a 'dashboards'.

Wieck Media

User Experience Design & Frontend Developer

2007 - 2008

Worked with the great people at Wieck designing and building sites for Honda, Ford, Allstate, and last but not least The New York Times, using the super cool Ruby on Rails framework and jquery javascript libraries, and my own CSS framework. Conceptualized, prototyped and built a system to video interview job candidates via the internet. Developed some smaller sites in Expression Engine a pretty good content management system built in php.
